A Message to Campbell Parents:---

Thrifty Boys Make Successful Business Men

The success of your boy, to a large extent, will depend upon the start you give him early in life.
It is not the amount of money you leave him so much as it is the kind of habits he learns from you.
Are you teaching him to save money?
This bank encourages boys' accounts and pays 4 per cent. interest.

your eggs for 1917? We have a fresh supply of Water Glass. Come in and we will gladly tell you how to use it.

Orchard City Drug Co.

Birth announcement cards at Smith's.
Quality stationery at Smith's.
Esparto—\$20,000 bonds voted for familiar school here.
Prospects are for 100,000 acres rice producing in 1917.

Playing Cards, 15c, 25c, 50c at Smith's.
Sisson—\$7,000 bonds voted for high school here.—Sawmill to be built.
More than 22,000 women and children are employed in California canning industry.

Local and Personal

For Sale: 1 set double work harness, in good condition.
B. DOWNING.
Mrs. H. W. Higbie is visiting friends in San Francisco today.
Mr. Tinley Leedom of Turlock was a visitor at the H.A. Watrous home Sunday. Remember that Newcomb has ladders for thinning cots. All lengths, 8 to 18 ft. 295 Campbell Ave.
The April birthday social will be held at the Congregational church this (Friday) evening.
Miss Amy Mildred Warner and Miss Cuthbert of San Francisco were guests of Mrs. H. W. Higbie Sunday.
Miss Anna White of Portland, Oregon, arrived last week for a visit of several weeks at the Geo. N. Stray home in the Willows.
For Rent: Fine 6 room mod. home, in fine shape, lots of fruit. Also distillate burner at a bargain. Call at Press office for information.

Men and Boys' Elk skin outing shoes. Try a pair of Neolin soles. They have all the advantages of leather taps, plus the extra wear.
E. E. SOWER.
All those desiring to take a motor trip to Mt. Hamilton on April 28th please leave names with Mrs. Robt. A. Holmes, Jr., 185 N. Central avenue, Campbell. All names must be in by April 24.

Ed. Yocco and M. W. Buster of the U. C., and R. C. Hickie and E. K. Brown of Davis school were here Monday in the interest of the Farm school picnic at Davis April 28th. Ed. Yocco was a former graduate of the local High.

Ed. and Louis Genasci have been busy the past week installing the telephones and lines in to the camp of the Campbell Redwood Lumber Co. on Gazos creek. We hear they are also incidentally enjoying a feast of real (?) chicken, the kind you get with a peavey.

Al. Self of De Kalb, Illinois, arrived Saturday for a visit with his niece, Mrs. J. H. Stubbe. He was accompanied from Manteca by Mrs. Stubbe's father, Chas. E. Self who spent the week-end here. Mr. Self stated that he hadn't realized what a wonderful state we had until he saw this valley. Now he has lots of nice things to say of it.

The second of the fortnightly social evenings held at the home of Mr. and Mrs. James Turner, was as greatly enjoyed as the first. A cheerful fire in the huge fireplace rivalled the dancing teacher in popularity, and was destined later to spread its glow over the picnic boxes, so solemnly disguised in newspaper wrappers. But when the papers were consigned to the blaze, the delicious contents of the boxes rapidly disappeared amid many satisfied comments from the happy supper partners. The next meeting will be on Saturday evening, April 28.

Club Entertained

An unusually large attendance at the Pundita Circle's meeting at the home of Mrs. J. H. Stubbe proved that inclement weather does not cool the ardor of this enthusiastic club. Mrs. J. P. Beal, chairman of the music section, had arranged a delightful program. Its Easter theme appealed to the ear and touched a reverent note in the heart. The origin and meaning of Easter symbols was the substance of a very interesting paper read by Mrs. W. Nelson. At its close the club joined in singing, "Joy to the World."

Miss Forbes, in her usual pleasing manner, read M. J. Preston's poem "The First Te Deum," and gave an account of the "Stabat Mater." Rossini's "Overture" was then played on the Victrola.

Two pleasing duets, with Mrs. Toles as accompanist, were "The Crucifix" by Mrs. Williams and Mrs. Watrous, and "There is a Green Hill Far Away" by Mrs. Beal and Mrs. Pardoe.

By special request Mrs. Beal sang "Because I Love You Dear," and Mrs. Pardoe sang "Hold Thou My Hand." Both of these numbers received many compliments.

Little Ralph Stubbe sang an Easter song, and instead of an encore amused every one by reminding his accompanist that she had promised him a honey sandwich. It was forthcoming and the program proceeded to a piano solo, "Memories," very nicely played by Miss Marie Purmort.

The very handsome Victrola which graces the Stubbe home completed the program with the "Hallelujah Chorus" and "A Perfect Day."

The Club accepted an invitation from the Moreland Good Will Club to be its guest at the home of Mrs. W. A. Beal in the Williams Road.

Mrs. Stubbe served delicious home made ice-cream, cakes and candy.

Tennis goods? See Smith.

Van Arsdell-Townsend

A very simple but impressive wedding ceremony was solemnized at the Methodist church Wednesday morning, when Elsie Hollis Van Arsdell and Claude Townsend were united in marriage, the Rev. W. H. Lloyd pronouncing the words that made them man and wife.

Miss Ruth Lloyd played the popular Lohengrin march while the bridal couple, attended by Miss Ruth Van Arsdell and Frank Enemark, took their places, and accompanied the words of the service with "Traumerei" by Schumann, following the ceremony with "A Wedding March" by Raymond.

The bride was very prettily and becomingly gowned in a blue tulle suit, with large white hat, and carried valley lilies. The bridesmaid was attired in blue serge.

Mr. and Mrs. Townsend left immediately after the ceremony, at which the relatives and a few friends had been present, by auto for Santa Cruz where they will spend a few days.

They will make their home near Hollister, where Claude will be in charge of a ranch recently purchased by his father, and where they have a home furnished for their occupancy.

Both of the young people are well known throughout the community; having grown up here, and are popular in the social affairs of the younger set.

The Press joins with their many friends in extending best wishes for their future happiness and prosperity.

Annual Picnic

The 9th annual Picnic Day of the University Farm at Davis will be held on the 28th of April this year. Last year's Picnic drew the phenomenal attendance of 15,000 people, and the event was pronounced the "Greatest gathering ever assembled at any 'Picnic' celebration in Northern California."

This is the one day set aside each year for the express purpose of receiving visitors at the Farm, and giving them an opportunity to become acquainted with the Farm, and well as having a day of pleasure.

The morning program will include play ground, athletic, and livestock judging events for the young, and agricultural demonstrations for the men. The morning program will close with several addresses, the speakers including members of the student body and several prominent Californians.

The afternoon will be featured by the greatest live stock parade in the West, stock from the herds exhibited having won high honors at the International Live Stock Show at Chicago.

Other events on the afternoon and evening program include lecture and demonstrations of interest to the women, athletic contests, music, dancing, etc.

All departments of the Farm will be open to inspection and student guides will direct the visitors around the Farm.

All roads lead to Davis; excursion rates may be obtained from the railroads, and good time is promised to everyone. Come early; bring your basket lunch, and enjoy California's greatest rural gathering.

Parlor Concert

A number of friends were given a most enjoyable treat Friday evening when they were entertained at the Kalas-Halamicek home on Los Gatos Santa Clara road. Messrs. Jan Kalas and Jos. Halamicek, our far-famed musicians, accompanied by Miss Bozena Kalas, rendered several favorite trios, duos, and solos to most appreciative listeners. Miss Helen Kalas sang a pretty solo and responded with a sweet little encore in the Bohemian.

Following the musicals, refreshments of cakes and punch were served. The guests departed with many expressions of appreciation for the evening's pleasure.

A. W. King went to Oakland today for a week-end visit and vacation.

Miss Hattie DePuy will go to Montone and Glendale Monday to visit friends. Miss DePuy expects to be gone about two months returning via the San Joaquin region.

Mesdames Reynolds, Fawcett and Sherer and Miss Lawrence went to Martinez Monday to spend part of the day with Mrs. G. E. Atkinson. T. L. Sharp did the auto service for the party.

A very pleasant Easter musical program was given by the augmented choir of the Los Gatos Methodist church at the Campbell church at the Sunday evening union services. The church was well filled with a most appreciative audience as the performance had been well advertised. To Miss Andrews is due a great deal of credit for the masterful manner in which she conducted the big chorus. Misses Alice Conkling and Ruth Lloyd assisted at the organ.

THESE BARGAINS ARE OFFERED FOR BUT A SHORT TIME LONGER

Palmolive Shampoo and three cakes of Palmolive Soap, 75c in value, for only 44c. Palmolive Shampoo is delightfully cleansing, and astonishingly easy to use. Simply wet the hair, apply a tablespoonful of the shampoo, and rub to a stiff lather. Wash out the lather and make a second application of shampoo. After a thorough rinsing the scalp will be found pink and clean, and the hair light and fluffy.

A 50c jar of **Palmolive Cream** and three cakes of Palmolive Soap for only 44c. You know that the north-west wind will soon be a regular guest, and clouds of dust a daily afternoon torment. The sun, too, will get in its blistering work. Under these conditions a face-cream is not a luxury; it's a necessity. Any face cream of fair quality is good for you; but Palmolive Cream is better. Use it daily, rubbing it into the skin until it disappears. The complexion benefits will repay your efforts ten-fold.

Don't fail to take advantage of these two bargains.

Where you get a square deal for your round dollars.

USED WIND POWER

Ancient Chinese Records Tell of Kite Carriage.

Same Idea Was Involved in Patent Issued for "Motor Car" to Hugo Upton During Reign of James I of England.

The first record of a vehicle traveling without animal power is found in the ancient Chinese records, which give an account of the kite carriages. These vehicles were driven by the wind blowing against a sail attached to the carriage. In the early reign of King James I of England, a patent was issued to Hugo Upton, reading as follows: "For the sole making of an instrument which shall be driven by the wind for the transportation or carriage of anything by land." Some believe that Upton secured his idea from kite carriages in old China.

However, the history of mechanically driven carriages dates back to 1680, when Sir Isaac Newton proposed a steam carriage to be driven by the reactive effect of a jet of steam issuing from the nozzle at the rear of the vehicle. Some years later a crude carriage was built, an early record of which reads as follows: "Mr. Pinchbeck has recently built a curious steam machine that has traveled without horses for 40 minutes and has covered a considerable distance." In 1759 there appeared an English advertisement reading as follows: "Mr. Ladd's patent four-wheel carriage that goes without horses and will carry four or five persons at the rate of six miles an hour is built on solid mechanical principles." In 1802 Richard Trevithick built a steam carriage, which was exhibited at London, having driven itself 90 miles. In 1830 a horseless carriage named "the automaton" was built by Walter Handcock. This was really the first steam carriage that proved at all practical. It covered 4,200 miles during its life and carried a total of 12,761 passengers.

The first internal combustion engine was invented by Abbe d'Hauteville in 1678, in which the explosive power of gunpowder was employed to drive a piston in a cylinder. This was the forerunner of the modern gasoline engine. Some years later John Street developed an engine operated by liquid air ignited by a flame. The first internal combustion motor which used gas was invented in 1884 by Gottlieb Daimler. In 1885 he successfully applied this engine to a bicycle, and in 1886 Carl Benz invented his single horizontal cylinder, water-jacketed engine, which he applied to a three-wheeled carriage. The first practical gasoline automobile built in America was constructed by C. E. Duryea in 1892, but it was found to be underpowered.

In 1894 he built a new four-cylinder car which proved quite successful in the Chicago Times-Herald race. The first automobile endurance race of international importance was held in France in 1894. Two Panhard machines contested. Both claimed a 3.5 horsepower and were driven by Messrs. Panhard and Peugeot. In 1895 the second automobile endurance race was held in France and covered a distance of 1,730 miles at the then remarkable average speed of 15 miles per hour. Six years later, however, the same course was covered at the rate of 50 miles per hour. In 1897, at the Paris-Trouville road race, a speed of 29 miles an hour was developed in a gasoline automobile. What a difference today. Not long ago a 300-horsepower car raced at a terrific speed of 143 miles an hour. Even pleasure cars easily run off 50 miles an hour.

Elbows.

Everybody has elbows and especially famous people, so that occasionally they can rub them with the masses. The elbow is a symbol of democracy and if people hadn't discovered how to rub them we might still be living in an age of feudalism. The elbow is very useful and some people who haven't a brain in their heads elbow their way through life and don't seem to mind the difference. Science has frequently been asked what people would have done if they had no elbows and has explained the baffling question in this way—they would probably have something else just like them. The elbow is a valuable organ, or member, and if you have an arm to cut off you will need an elbow on it so that the arm can be cut off either above or below the elbow. Elbows are of all sorts, such as ragged, wrinkled, shiny and rheumatic. Elbows are well enough in their way, but a great nuisance at quick-lunch counters.

India's Sunday School Growth.

The first Sunday school in India was established at Serampore, Bengal, in 1803, when three boys were the founders and teachers. There are now 16,936 Sunday schools in India, with 636,614 teachers and scholars, speaking 45 dialects. Every year the India Sunday School union conducts an all-India Scripture examination, covering both oral and written work. In 1905, this examination was taken by 20,495 students in 28 different dialects, and of these 17,592 passed the tests satisfactorily.—Christian Herald.

Up the Ancient Tigris

BARTERING WITH THE ARABS

TRANSPORTATION for the Tigris corps was arranged and we were told to embark on a paddle steamer. We were advised to draw rations, as we would have to feed ourselves during the trip, writes a correspondent of the Chicago Daily News in describing a trip up the ancient Tigris river with the British forces.

The captain of our steamer was a Persian. He was mentioned in dispatches for gallant conduct preceding the investiture of Kut. His ship was the last to escape before the Turks surrounded General Townshend. Because of many years' experience in navigating the Tigris between Basra and Bagdad, he is one of the most valued captains on the river. He navigates his ship from a bridge incased with steel armor which is bullet-spattered in several places. In the old days sandbags were piled four deep along the rails of the ships to protect crafts against Arab snipers. It has been some months since there was serious sniping along the river. The Arabs found that it paid better to sell eggs and fresh chickens.

Six officers and myself shared the forward bridge deck. The after deck was packed with stores, mails and

campaigners say that they are second only to those of Egypt. An admirer of a Tigris landscape and sunset would think of spice winds and balmy breezes. The native Arab says, "God made hell and found it was not bad enough, so he made Mesopotamia—and added flies."

By 10 a. m. we cordially hated the Tigris and its palm-tree bank. A blistering hot wind blew out of the north. If one touched bare metal—the skin of one's fingers staid on the metal. I had a dozen candles. When I looked for them at night I found only twelve limp strings—every particle of tallow had melted and dribbled away.

Arabs Fish on Banks.

The Arabs who live along the Tigris in summer are called "fish eaters." They migrate to the hills in winter to escape the floods, but return to their bits of river lands in the spring. We saw scores of families standing waist-deep in the river hauling out bony, wiggly fish as fast as they could bait their hooks with bits of dough. The children seem to live in a perpetual state of bathing. They have a strong aversion to clothes of any description and are less dirty than their parents because they have not lived as long. It is now date-picking time, and those

GETTING FRESH FISH

white troops returning from hospitals to their units at the front. The bags of rice and flour comprising the cargoes of the barges fastened on either side of our steamer formed couches for several hundred native troops. We spread our camp beds, camp tables and collapsible chairs, hung porous water jugs on the ship's rail, so that the hot wind would cool the water in the jug by evaporating the moisture which seeped through, and settled down for our term of agony.

Sleeping Amid Money Chests.

The senior combatant officer-passenger is always chosen as officer commanding troops. The "O. C." in our case was a major who had been in America. When I first saw him he was swearing roundly at a native sergeant and six men who had just deposited at his feet something like \$50,000 in Indian money and informed him that he, as "O. C.," was responsible for its safe arrival at Amara. He counted the boxes, examined the seals and signed a receipt for the treasure.

We moved the boxes of money between our beds so that they formed a table for meals and a dressing stand for shaving in the morning. He then ordered all the Indians of fighting strength to fall in on the after deck and "told off" men for the guards.

The first reaches of the Tigris were beautiful. The river was broad and swept along in graceful curves. Its banks were deeply lined with luxuriant date palms, each with a necklace of glistening, golden fruit. But barren wastes lie 300 yards behind them.

Tigris sunsets are wonderful. Old

native troops who are not fishing may be found at the top of date trees suspended by rope slings similar to those used by coconut pickers.

Late in the afternoon we passed the new mouth of the Euphrates. A few years ago this river got tired of its mouth at Kurna and cut a new one a few miles north of Basra. It is said that in a few years the mouth at Kurna will become hardly more than a canal. The Euphrates water is a sulphur white, while the Tigris water is now comparatively clear. For miles after joining the waters of the two rivers keep to their own sides of the stream.

Each officer's servant prepared his master's dinner toward dark. Our desert, established by rigid medical regulation, was ten grains of quinine—ten grains every night means 300 grains every month.

Good Sleepers.

Learning to sleep well is learning to live well. But it does not follow that the good sleepers are necessarily good people or that they know how to live. Good sleepers are to be found among those who break the laws of morals and of health. They have the gift. Whether they will be able to keep it through their lives is a question. The effects of their lawbreaking may suddenly overtake them and the ravages may weaken their sleeping capacity. In the depths of consciousness there is often a rebellion of the mind that is none the less persistent because it is silent and that may suddenly break out into a revolution.

UNCLE SAM HAS FIRST LINOTYPE

Places It on Exhibition in the Smithsonian Institution at Washington.

EARLY MACHINES WERE CRUDE

Model Now on Display of Much Interest as Showing Great Progress Made in Type-Setting Equipment.

Uncle Sam now has on exhibition the first linotype machine that was made. The machine has been installed in the Smithsonian building at Washington. The exhibit is of particular interest as showing how crude was the first attempt to produce a type-setting machine which now has reached such a high state of perfection.

This particular idea, the invention of Mergenthaler, revolutionized printing. It was the first machine to cast a complete line of type ready to print from.

There are three machines exhibited in the Smithsonian halls which are closely related to the development of this contribution to the art of printing.

The First Linotype.

Two of them are early models which indented strips of papier mache (matrices) from which stereotype casts were made. Some of these earlier machines consisted of a cylinder which held the type faces and the mechanism to bring it into position to indent the paper—all of which was controlled by the pressing of a key. This style, called a rotary impression machine, was built mainly by the late Ottmar Mergenthaler in 1877-78 under the auspices of J. O. Clephane, who later organized the National Typographic company. The second, called a stereotyper, worked well, but the casting of the slugs was found to be unsatisfactory, and Mr. Mergenthaler undertook the invention of one machine to do all the work.

He started work with L. G. Hine early in 1883, making a small experimental machine, which printed but 12 letters at a time, but demonstrated the fact that a full-sized machine built on this principle would be an enormous step in advance. This was accomplished when the large machine was built—the third of the series exhibited in the Smithsonian building—which was the first machine from which linotype bars, or slugs, were cast. On the printing face the characters formed a complete and solid line of type, similar to a line of individual type soldered together, and they were ready for use; a number of lines making up a column or page—just like the individual lines of this article.

How Machine Operated.

The matrices or dies for the different letters used in this first machine were on long tapered bars, arranged side by side vertically, each containing a complete alphabet, other characters and spaces. The operation of the keys in the keyboard set a number of stops, one for each letter depressed, and when the whole line was set, the entire line of matrix bars was lowered until the different bars came into contact with their respective stops, which were at various heights, so that at a certain point the characters on the matrix bars formed a line of reading matter. There was no automatic justification, or spacing, to make the line the exact length required, but it was left to the operator, who struck the space key and filled in with thick or thin spaces on the tapering matrix bars. The line of matrix bars was then clamped together, a mold was interposed between the matrices and a pot of molten metal, which moved up the slot in the mold, and the linotype bar was cast. The line was then unclamped, the matrices automatically raised to their normal positions and similar operations for casting the next line were performed.

"LUCKY OWEN" HE IS CALLED—HERE'S WHY

This picture of Mary Pickford, the motion-picture star, and Owen Moore, her husband, was snapped as they were en route to the Pacific coast, where scenes in a new photoplay featuring the screen idol were to be taken. Mr. Moore is able to avoid being known universally as "Mary Pickford's husband" only by reason of the fact that he is a well-known movie actor himself. "Lucky Owen" is the name to which he answers among his associates.

Mother's Cook Book

Feather Ginger Bread.

Sift together the following dry ingredients: One cupful of flour, one teaspoonful each of soda, salt, ginger and cinnamon. Blend a quarter of a cupful each of sugar, molasses, melted lard, sweet milk and sour milk. Beat one egg and combine all the ingredients, stirring well. Bake in a dripping pan 20 minutes.

Peanut Soup.

Cook together a cupful of celery, a tablespoonful of onion and a cupful and a half of boiling water; cook the vegetables until tender, keeping the water as it evaporates, to a cupful and a half. Add a cupful of milk to a cupful of peanut butter and blend. Put a tablespoonful of butter in a saucepan and when bubbling hot add a tablespoonful of flour, a teaspoonful of salt and an eighth of a teaspoonful of pepper. Add the stock and cook until smooth, then add two cupfuls of milk, the peanut mixture and three tablespoonfuls of finely chopped red or green peppers.

Cooked Raisins.

Raisins are desirable food for children when they are steamed or cooked. Otherwise the dry skins may be hard for them to digest.

Fish Souffle.

Make a white sauce of two tablespoonfuls each of flour and butter, a quarter of a teaspoonful of pepper and one and a half cupfuls of milk; add to this a teaspoonful of minced parsley, a tablespoonful of minced onion, a can of fish flakes, which have been carefully picked apart with a fork, then add three beaten egg yolks to this mixture and fold in the beaten whites. Bake in a buttered dish in a moderate oven till firm in the center and serve at once with or without tomato sauce.

Apple Lemon Pie.

Mix together two cupfuls of chopped apples, a half cupful of rolled crackers, the grated rind and juice of two lemons, two well-beaten eggs, two tablespoonfuls of butter and one and three-quarters cupfuls of sugar. Use with a double crust. This makes two small pies or one large one.

Chocolate Sponge Cake.

Beat the yolks of three eggs, add a cupful of sugar and mix until creamy, add three tablespoonfuls of chocolate which has been melted over hot water, then a quarter of a cupful of milk and half a teaspoonful of almond flavoring. Sift a cupful of flour with two teaspoonfuls of baking powder and a pinch of salt, mix well. Add the whites of three eggs beaten stiff at the last. Bake in a tube pan and fill with whipped cream, surrounded with sliced peaches.

Nellie Maxwell

Wise and Otherwise.

When the boss is away his assistant poses as a wise guy.
Some matrimonial alliances are defensive as well as expensive.
But what a lot of near truth comes out in a political campaign!
Even a doll-faced girl isn't satisfied with sawdust breakfast food.

Don't Train the Child As One Would a Young Animal, Is Advice Given to Parents.

If your idea be to train the child as you would train a young animal, so that you can govern him, to the admiration and amazement of your neighbors, so that he will do as you say, and will consult you humbly in all matters, then doubtless punishments and rewards of a very definite order will be necessary. Sugar and bits of meat and judicious whippings and pettings are the only means I know for training little animals, writes Laura Spencer Porter in Mother's Magazine.

But if your object be, as it should be, to develop his understanding and his character and to make him a sensible, serviceable, self-governing individual, there will be needed two things: A very limited administering of your own variable and whimsical rewards and punishments, and a very extended effort to bring him and yourself to a clear understanding of the invariable and unalterable consequences and results that life continually and inevitably administers.

Not only are most of the punishments we administer stupid, but they are hopelessly inadequate, trifling, I had almost said frivolous. In urging you to punish your child less with your own ill-judged punishments, I am not begging you to be more lenient, but less so.

What I would beg you to do is to better fit him to avoid life's punishments. You punish him illogically when he fails to obey you, by depriving him of a cherished toy or a cherished play; but life, with unfailing logic, punishes him when he goes counter to her commands, by depriving him of love, of happiness, of service, of success. If he continues to do as you tell him not to do, you deny him to come to the table, perhaps, or you send him away for a lonely hour by himself; but if he continues to do what life tells him he must not do, there may be years of loneliness and wretchedness and failure that he must pay.

Facts in Figures.

United States in 1916 mined 75,500,000 tons of iron ore.
There were 570 new kindergartens opened in 1916 in the United States.
There were 509,000,000 tons of coal mined in the United States last year.
United States forestry service last year reforested 10,390 acres with 6,147,637 trees.
There are 80,000 Christian Endeavor societies in the world, with 4,000,000 members.
There were 6,324 fires last year in United States national forests. Average loss, \$60.41.

Why Soap Removes Dirt.

Although soap has been known for ages, it is only a little more than a century ago that the first scientific explanation of its cleansing action was offered. Everybody, of course, knew that the lather produced through friction from wet soap would remove dirt. But it remained for science to show that, through contact with water, soap is decomposed into fatty acids and an alkali; that impurities are set free by the alkali, and that the fatty acids entangle them, all being removed with the lather.

An Open Letter to Our Teutonic Guests
To the subjects of Germany and her Allies residing in the United States:
You constitute a goodly portion of the four million residents of the United States who were born in Germany and Austria-Hungary.
You left your country because you were not satisfied with it. Life under a military autocracy did not appeal to you.
You came to the United States in search of happiness. And you found it or you would not have remained.
We gave you welcome and our good will. We gladly shared with you our liberty and our prosperity. The vast majority of your number will repay our good will and hospitality by refraining from giving offense to our people or our government during the approaching war with the central powers. And in this event the same flag will protect your rights in war that has protected them in peace.
But there is a militant element among you with the spirit of violence and blood thirst upon them.
You are urged to do your utmost during the trying days to come to restrain these people from lawless acts.
Already, while at peace with our country, German spies and enthusiasts have destroyed property here and even human life in their zeal to serve their kaiser. Members of this hot-headed belligerent element are now located in virtually all of the great industrial plants, factories and transportation lines of our country and in many of our commercial houses.

There is good reason to believe that when war is actually on with Germany this element will undertake a campaign of violence, including the dynamiting and destruction of American property and life.
Now is the time for you orderly, law-abiding subjects of the two kaisers to organize to assist in preventing this senseless program and the deadly consequences which are sure to follow its inauguration.
There are no bounds to the fierce passions of a war mob. Its cruel wrath is sure to fall upon the innocent in far greater ratio than the guilty.
The injury which these enemies of our country within our borders could do to our industries or in the destruction of American lives would not have the slightest effect on the result of the war.
It is of importance that such people who are preparing to violate the law and to commit violence against our flag and our government should know that they will not be treated as soldiers or prisoners of war but as assassins and that they will be promptly hanged.
It is true that our government will not take prominent Germans as hostages, stand them against a wall and shoot them when any of their misguided countrymen are guilty of violence, as the German government has done in Belgium. It is also true that our civil authorities throughout the country have ignored this danger and made virtually no preparation to meet it and we may suffer to some extent as a consequence. But the day of reckoning will quickly come for such enemies as violate the asylum we have given them and which we will offer them during the war. Will you not do your share to prevent this utterly needless sacrifice of life and property that would follow such a program?—N. Y. Sun.

Local and Personal
Miss Mabel Masciorini has accepted a position as assistant bookkeeper at the Leon furniture store.
Messrs. Kalas and Halamicek were at Fresno Monday to Wednesday playing in concert with the Fresno Symphony Orchestra.
Mrs. L. M. Beall entertained at an afternoon tea Wednesday, Mesdames E. Foot, F. K. Bartholomew, H. Mitchell, and M. Beredict.
Dr. W. A. Sehorn will go to Merced the first of the week to look after his hay crop and arrange for recropping his farm. His dental office will be closed Monday.
The California State Press Association will take its annual summer outing enjoying the wonders of the Yosemite May 19-26. The slogan, "Meet me in Yosemite."

Red Cross Day
Sunday, May 27th, will be Santa Clara County Red Cross Day and will be celebrated by a big benefit baseball game at Santa Clara varsity grounds between the Campbell Athletics and Alcatraz Parlor, N. S. G. W. from San Francisco.
The three Native Son's Parlors of San Jose, the Santa Clara Parlor, the Red Cross committee and other Societies will hold a mass meeting in the near future in San Jose to outline their campaign. It is predicted that the largest crowd ever in attendance at a ball game in Santa Clara county will be present and the clubs scheduled to play will no doubt give a good account of themselves.
Mr. J. F. Duncan, for the Bank of Campbell, has very kindly agreed to sell tickets to those of our little city who no doubt will be glad to witness this struggle as well as to help a most worthy cause. There may be some who cannot go, for various reasons, but this will not mean that your little four bit piece will not be appreciated just the same.
G. C. Bradford, manager of the "Athletics", pulled a good one when he put Campbell into the ring in this big benefit. Ye Editor feels that Campbell has a few business men that are awake to this big advertising feature and will lend their efforts to the cause and become genuine boosters. Mr. W. J. Benson of San Jose is promoting the scheme for the Native Sons Parlors.
The ball game will probably follow directly after the big parade that is being planned, and it goes without saying that it will be big league base-ball.

Chinese Conquer Nervousness.
The nervous hurry that eats into so many of us in this continent the Chinese will not tolerate in himself. When he finds himself in a hurry he sits down right where he is and waits until he is over his hurry, then he goes on about his business in a much more efficient frame of mind. This must be the way to beat out nervousness or fear.—Minneapolis Journal.

Land Case Settled
Fred W. Lake of Oakland, California, a public land manipulator has at last received his quietus, according to a copy of the complete text of the decision of First Assistant Secretary Vogelsang of the Department of the Interior dismissing the protest filed by Lake against the transfer to purchasers under the state of lands aggregating about 225,000 acres, which has just been received by the office of the Surveyor General.
Lake, endeavoring upon technicalities to defeat the state purchasers, filed in the State courts hundreds of actions in mandate directed against the surveyor general and carried the matter to Washington in the form of a protest which is finally dismissed in Vogelsang's decision. This decision is a clean cut denial of all of the technical legal grounds upon which Lake's innumerable suits and protesters are based. Surveyor General Kingsbury and Attorney General Webb have united in fighting Lake vigorously in the courts and before the department of the interior for more than ten years past.
The decision concludes by directing the Commissioner of the General Land Office to proceed with the adjudication of all pending California state land selections. The state's purchasers will ultimately receive patent from the State to the lands which have been involved in this long standing controversy.

Congregational Church Notes
Church services, 11 and 7:30.
S. S., 9:45 and C. E. 6:30.
The pastor of this church is to fill the pulpit of the Congregational church of Pacific Grove next Sunday. In his absence the pulpit of our church here will be ably filled both morning and evening. In the morning Rev. Marion B. Davenport, formerly pastor of our church in Tulare, will preach. At the evening hour the Rev. Burton M. Palmer, D. D., pastor of the Congregational church in Pacific Grove, will occupy the pulpit. The pastor bespeaks for these visiting ministers the usual kindnesses he receives; and he will appreciate any extra courtesies that may be extended to these friends of his.
The topic for Christian Endeavor is, "How Lying Undermines Character". The young people are especially invited to remain for the evening church service to hear Dr. Palmer.
At the Birthday Social on Friday evening of this week the guests of honor will be those whose birthdays occur in March or April. All are invited to enjoy the evening with them.
(In Sunday morning, April 29th, Dr. Arthur H. Briggs, representing the Anti-Saloon League, will be present and give an address. At this service opportunity will be given to make pledges to the very important work of this organization.

California Weekly Industrial Review
American Sugar Refining Co. to spend \$1,000,000 for trademark advertising in 1917.
\$40,000,000 of navy work to be done on San Francisco bay.
Richmond—Princeton Knitting Mills to open with 30 hands.
California tourist trade for 1916-1917 winter is estimated by S. P. Co. at 110,000 with total expenditure of \$44,000,000.
S. P. Co. is serving meals in day coaches from a wagonette for convenience and economy of passengers.
Orange county apricot growers will get from \$250,000 to \$300,000 for crop this year.
Los Angeles—Union Oil Co. begins work on industrial plant here to cost \$2,500,000.
Cottonwood agitating for \$40,000 Union High School.

Athletics Lose
In one of the best exhibitions of base ball staged in this community, our boys lost to Los Gatos last Sunday by a score of 3-0. It is our first defeat this season and, of course, it hurt, but, by heck, we know we can trim 'em next time and take the series.
It was cold, but the boys were going like a new Ford until the 4th inning when somebody let the clutch slip and we could not recover in time to save the day.
Gampolia hit to right for a two bagger. Peacock sacrificed him to third. Gilbert slammed a hot one that our second baseman did not handle. Gampolia scoring. Hardies hit to same place and another error was made. Nino was out. Purdy to Pierce. Olmstead lined to center and the fielder dropped the ball, scoring Gilbert and Hardies. Mayhan was out, Stevens to Pierce.
The Los Gatos boys gathered only 4 bingles off our "Billy" Paul, while we tapped their "Ollie" Nino for 5. It was really a pitchers' battle, but fate was against us, 3-0.
Next Sunday our boys do not play, it being their regular lay off day. The following Sunday, April 29, the club goes to Mayfield.

Catarrhal Deafness Cannot Be Cured
by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure catarrhal deafness, and that is by a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing will be destroyed forever. Many cases of deafness are caused by catarrh, which is an inflamed condition of the mucous surfaces. Hall's Catarrh Medicine acts thru the blood on the mucous surfaces of the system.
We will give One Hundred Dollars for any case of Catarrhal Deafness that cannot be cured by Hall's Catarrh Medicine. Circulars free. All Druggists, 75c.
F. J. CHENEY & CO., Toledo, O.

NOTICE OF ANNUAL MEETING OF MEMBERS
Campbell, Cal., April 5th, 1917
